

Business Continuity Planning

ISO22301

Objectives:

ISO 22301:2012 is the international standard for business continuity which defines best practice for developing and implementing a robust business continuity plan.

The concept that an organisation's systems and processes should be resilient against outside attack or natural disaster is also a key principle underpinning the ISO 27001 standard. Our ISO 22301 training courses provide delegates with the opportunity to attain industry standard qualifications and to help their organisation achieve compliance and best practice with ISO 22301.
